

ENTERPRISE QUANTUM COMPUTING HAS ARRIVED

Whether you already know exactly what application your company needs, or are simply looking to dip a toe in, we're your partner in real, no-nonsense quantum computing.

At Quantum Thought, we have developed proprietary offerings that will help you understand the inflection points in your business that can benefit from quantum computing and Artificial Intelligence. This is not a theoretical exercise in that we will identify specific strategic opportunities relevant to your strengths and initiatives, and clearly show you how to capitalize on them. Whatever we recommend, we can also implement.

If you would like to take your quantum future into your own hands, we also offer corporate education to enable your company to build its own quantum applications. Contact us to learn how we can help educate your decision makers on the coming quantum revolution and what it means for your business. We offer executive education sessions as well as quantum coding bootcamps for your engineering teams to suit your professional needs and goals

QUANTUM COMPUTING IN NUMBERS

\$1B

The amount of private and public money that was invested in quantum computing in 2016 alone.

200

Number of seconds Google's quantum computer took to solve a problem that would take a supercomputer 10,000 years.

36%

The percentage of companies likely to adopt quantum technologies by 2022.

STRATEGY OFFERINGS

Quantum Roadmapping

Roadmapping can give you a significant advantage in a world where your competitors are already struggling to understand the monumental implications of quantum computing.

Company-Specific Use-Case Implementations

Quantum computing is a reality today. We architect & build applications specific to your R&D initiatives.

Workforce & Executive Education

We offer various levels of education to give everyone from your decision makers to your engineers the tools to build your own quantum computing applications.
